Section 1: Introduction

This walkthrough is over the Nintendo game The Legend of Zelda. The game is about a hero, Link. The Triforce, a magical item, has been broken into two pieces. Gannon, the villain, has one piece. Princess Zelda broke the other part into eight pieces, and now Link must find the eight pieces.

After you beat your first game in The Legend of Zelda, you will be able to play through the game again in the Second Quest. The only thing different in the Second Quest is that everything is in different locations.

As Legend of Zelda has a large map, I will use a standard map grid to describe locations throughout this walkthrough. The map is 16 units horizontally, and eight units vertically. The vertical units will be described as A-H, where A represents the units at the top and H represents the bottom. For horizontal units, I will use a number between 1 and 16. 1 represents the far left, and 16 shows the far right of the map. Your start location on the map is H8.

This walkthrough covers all the aspects of The Legend of Zelda. The walkthrough will cover how to get through the game step by step. It will also list items in the game.

Section 2: Walkthrough

This section gives you a step by step process for getting from the very beginning of The Legend of Zelda to the end credits. This section is designed so that you can get brief information or an in-depth process. Each section begins with a list of objectives you have to complete. Below the list of objectives are detailed descriptions on each objective you must complete to get through The Legend of Zelda in both quests.

Apart from the first sword, I do not tell you how to get items in the main walkthrough section. Check the 'Items' section for that.

A: First Quest

Objectives:

1. Get the first sword.
2. Get the first triforce piece.
3. Get the second triforce piece.
4. Get the third triforce piece.
5. Get the fourth triforce piece.

6. Get the fifth triforce piece.
7. Get the sixth triforce piece.
8. Get the seventh triforce piece.
9. Get the eighth triforce piece.
10. Defeat Ganon.

Objective #1: Get the first sword.

Go into the cave on the screen (H8) you start in. A person in there will tell you that it is dangerous, and you should take the sword he has lying in front of him. Leave the cave.

Objective #2: Get the first triforce piece.

Go to the first dungeon now, which on the grid is at D8. (To get to D8 from H8, your start position, go right, up, up, up, up, left.) Now you will be in the first dungeon.

Check the first room. If there is a locked door in it, leave the dungeon then go back in and it should be unlocked. Now, from the first room, go right and get the key in that room. Go back left then up. In this room, go left and then up through the locked door. Go right and get the map, then go up and get a key. Go back to the room where you got the map, and go right. Defeat all the enemies in this room to get the boomerang. Go to the right and get the key in that room, then go up and encounter the boss.

If you have a bomb, use it to eliminate this boss in a flash. Otherwise, use the hit and run method with sword pokes. After you beat this boss, pick up the heart container and go into the room to the right to get the first piece of the triforce.

Objective #3: Get the second triforce piece.

The second dungeon is, on the grid, located at D13. (Or, to get to the second dungeon from the entrance of the first dungeon, go right, down, down, right, right, right, right, right, up, left, up.) Go into the second dungeon.

In the first room of dungeon 2, go right. Grab the key, then head up, up, up, and up. Defeat all the enemies in this room to get a key. (If you go right here you can defeat the enemies for an upgrade to your boomerang.) Go up, then up again. In the room you arrive in, defeat all the enemies. Go up another screen and beat all the enemies. Make sure you grab the bombs the enemies will leave. Go up one room to fight the boss of the second dungeon.

To beat this boss, lay a bomb in front of it. It will eat the bomb and get hurt. Repeat once more and the boss will be defeated. Grab the heart container and go left to get the triforce.

Objective #4: Get the third triforce piece.

The third dungeon is located at H5. (To get to it from the entrance to the second dungeon, go down, right, down, left, left, left, left, left, down, left, left, left, left, left, down, right.) Go into the third dungeon.

From the entrance of this dungeon, go left, grab the key, go up, defeat the enemies for a key, then go up again. Now go left and left. Defeat the enemies to open the door below. Defeat the enemies in the next room and push the block on the far left down to open your passage downstairs, where you'll get the raft. Now go back up to the room. Go up twice and grab the key. Go down, then right twice. Bomb the wall to the right and go through. Defeat the enemies and then go right. Defeat the enemies in this room and go up. Now you will fight the boss of the third dungeon.

The easiest way to beat this boss is lay bombs for it to run into. When the bomb explodes on the boss, it will most likely take out several of the four heads. Defeat any remaining heads with a sword poke or another bomb. Head up after grabbing the heart container and grab the triforce piece.

Objective #5: Get the fourth triforce piece.

The fourth dungeon is located at E6. To get to it, you must get on the raft and ride across the water from F6. (To get to F6 from the exit of the third dungeon, go left, up, right, right, up, up.) Enter the fourth dungeon.

From the first room of the dungeon, go left and defeat the enemies for a key.

Go right and then up. Go up into the next room and grab the key. Go left then up and get the key. Now go right and defeat the enemies. Open the floor to the room to the right. In the room to the right, defeat the enemies and head downstairs to get the ladder. Now go up to ground level and go left twice. Go up across the river and into the net room. Go up into the next room and defeat

the mini boss (which is the boss from the third level). Go up and then right three times. Go down and defeat the enemies. Go right. Now you will fight the boss of dungeon four.

To defeat this boss, walk up to it and whack it's heads. After one head dies, it will start running around the room. Dodge it and manage to take out the other head as well. Grab the heart container and go up into the next room for the heart container piece.

Objective #6: Get the fifth triforce piece.

The fifth dungeon is located above a maze. To get through the maze, first you must visit the person in the waterfall. The waterfall is at B11. (To get to it from the fourth dungeon, go down across the water, right, right, right, right, right, up the right side, up, up, right, up, left, left.) Walk into the waterfall and pay the person 20 rupees. Go back outside and go right. In the maze you're in, go up four times. You'll arrive at the fifth dungeon.

In the fifth dungeon, go up. Defeat all the enemies, grab the key, and go up. In this room, defeat the three mini-bosses (the bosses from dungeon 2). Go left and defeat all the enemies for a key. Go down and blow up the wall to the left and go through. Go down the pit and come out the other side. Go left and go below ground to get the Whistle. Now go back right, through the underground passage, right, up, thrn right. Go right, then up. Defeat the enemies for akey.

Go up, then up and grab the key. Go left and defeat the enemies for a key. Go left, then left again. In this room is the boss to the fifth dungeon.

Begin the battle by playing the whistle. The boss will shrink. Poke him with your sword a couple times and he'll die. Grab the heart container, then go up a screen to grab the triforce piece.

Objective #7: Get the sixth triforce piece.

Now you must go to dungeon six. The sixth dungeon is located at C3. (To get to screen H1 from the exit to the fifth dungeon, go down, left, left, left, left, cross the river with a ladder and go one screen left, left, down, left, down, left, then up.) Enter the sixth dungeon.

In dungeon six, go right and defeat the enemies for a key. Go left twice. Go up twice and defeat the enemies. Go up twice and defeat the enemies in this screen. Go up and defeat the enemies then go up. Defeat the mini-boss (boss from dungeon 4) and then go right. Go down, grab the key, then go down and defeat the enemies. Go right and down to the underground level. Come up the other side and into the room. Go down and defeat the enemies for a key. Go left and then up to fight the boss.

To beat this boss, shoot an arrow into its mouth when it opens. With a few arrows, it should be dead. Grab the heart container and then go up to grab the sixth triforce piece.

Objective #8: Get the seventh triforce piece.

Now it's time to go to the seventh dungeon. On the grid, the seventh dungeon is located at E3. (To get to the seventh dungeon from the exit of the sixth dungeon, go down, left, down, left, down, down, right, right, up, up.) To find the entrance to the seventh dungeon, blow the whistle on this screen. (Before you enter the seventh dungeon, you might want to pick up some Bait and an extra Key if you don't have one at a store.)

From the first room of the seventh dungeon, go up then right three screens. Defeat the mini-boss (the boss from dungeon 5) in this room and then go right. Defeat all the enemies in this room for a key. Now go left four screens. Blow up the wall at the top of the screen and go through the opening. Go up another screen. Defeat all the enemies in this room and go up. Defeat the mini-boss (the boss from dungeon 5), and then blow up the wall to the right and go through.

Defeat the enemies for a key. Go left two screens and then go up one screen. Give the creature some Bait and he will let you by. Go up to the next screen. Now go right to the next screen. Blow up the wall to the right. Go through. (You can go below this room to grab the Red Candle.) Blow up the wall on the right of this room and go through. Now go right and then defeat the mini-boss (the boss from dungeon 5). Go up one screen and bomb the right side of the room.

Go down the pit and come out the other side. Blow up the wall on the right of this room and go through to fight the boss.

This boss is the same as the boss in dungeon 1, except it has a little more hit points. You shouldn't have much trouble with this boss. Once the boss is

gone, grab the heart container and go right one room to pick up the seventh piece of the triforce.

Objective #9: Get the eighth triforce piece.

It's time to get the final piece of the triforce. The eighth dungeon is located on screen G14. (To get to dungeon 8 from dungeon 7, go down, down, right, right, right, right, right, right, right, right, right, down, right, right, right, up, left.) On this screen is a lone tree blocking the path between the two sides of this screen. Burn it down to enter duneon 8.

From the first room of dungeon 8, go right and pick up the key. Go left then up to fight the mini-boss (the boss from dungeon 3). Bomb the wall on the upper end of the room and go through. In this room, defeat all the enemies and grab the key. Go up a room two rooms and then bomb through the wall on the northern side of the room. In the next room, you'll fight a mini-boss (the boss from dungeon 6). Go up and defeat all the enemies. Go right and you'll get the Skeleton Key. Now you no longer need normal keys. Go to the left and down two screens. Defeat all the enemies in this room and go to the right. Go down the tunnel and out the other end. In the room you arrive in, blow up the wall on the upper side of the screen and go through to fight the boss.

This boss is the same as the boss in dungeon 4, except it has 4 heads instead of 2. The boss should be no problem. Once you trash it, grab the heart container and head north to complete the triforce.

Objective #10: Defeat Ganon.

Now it is time to encounter Ganon. The ninth dungeon is located at A6 on the grid. (To get to the dungeon, blow your whistle to dungeon 6. Then go down, right, up the right path, right, up, right, right, up, left, left.) Blow up the left of the two rocks to enter the final dungeon of the game.

Enter the ninth dungeon. Go up. In this room, you will be stopped if you don't have a full triforce. Go left, then bomb the upper wall and go through. Go down the stairs and through the tunnel. In the room you come out of, go right twice. (At this point, go down, bomb right, defeat the enemy by attacking the creatures around it first, go up, then bomb up and go underground for the Red Ring.) Go up and listen to the old man. Bomb the left wall and head through. Go down through the tunnel in this room. In the room you turn up in, go left twice. Defeat the enemy in this room by defeating the spinning creatures around it then defeating the main body. Go down the tunnel and out the end. In the room you arrive in, bomb the upper wall and go through. In the next room, defeat all the enemies and push a block to reveal the hidden passage in which you will find the Silver Arrows. Go back up to ground level and go down and back through the tunnel. Go up, up, up, and then bomb left. Defeat all the enemies in this room and push the block to reveal a secret passage. To reach this passage, step on the top row of the screen and then rush behind the block that rushes forward down the stairs. Go out the other end of the stairs and bomb the left wall. In the next room, defeat the enemies and go down the stairs and out the other end. Defeat the enemy in the room you come out in (defeating this type of enemy is described earlier in this objective) and go up. Link will hold up his half of the triforce, and the room will brighten and reveal Ganon.

To defeat Ganon, go in the lower right corner of the room and poke around in all four directions while dodging fireballs. Eventually you'll hit Ganon. After several hits, Ganon will freeze and turn red. Shoot him with a Silver Arrow and he'll be history. Grab his half of the triforce and go up into the next room, where you'll find Princess Zelda and complete the first quest of The Legend of Zelda.

Go to the right and bomb the upper wall and go through. Now you'll fight the boss of the first dungeon.

Objective #3: Get the second triforce piece.

The second dungeon is located at D5. (To get to the second dungeon from the entrance to the first dungeon, go right, down, down, down, down, left, left, left, left, up, up, up.) Underneath the statue in the middle of the top row is the entrance to the second dungeon.

Go up one room then defeat the mini-boss (three bosses from dungeon 2 in the first quest). Go up then defeat the monsters and reveal the staircase. Beneath the room is the Raft. Objective #10: Defeat Ganon.

Now it is time to face off with Ganon. Ganon's dungeon is located at A1, the upper left corner of the map. (To reach the ninth dungeon from the eighth dungeon, go left, left across the river, left, left, left, left, left, up, left, left.) Blow up the wall in this area to open up the entrance to the final dungeon of the game.

From the entrance of the dungeon, go up, left, left, left, up, then up. Push the block up then bomb the left wall and go through. Go back and push the block left, then go up. Skeleton Key - This key unlocks all doors that require keys. It is found in dungeon 8 in both quests.
